

ABSTRACT

The invention relates to a novel anti-wrinkle cosmetic based on natural plant extracts. Said cosmetic comprises, in a W/O
5 silicon system, between 0.05 and 2 wt. % of a *Passiflora* extract, and respectively between 0.05 and 3 wt. % of *Papaver*, *Mentha* and *Myrtus* extracts, along with standard cosmetic auxiliary agents, carriers and active ingredients. In addition to a silky texture, said cosmetic has a long-lasting
10 moistening effect, and an elasticity improving characteristic.
